## Overview

McCain's Backplates provide a visual contrast between signal heads and the background enhancing signal visibility. Available for standard and programmable signal heads in eight and twelve inch sizes, backplates can be configured for one to five section, cluster, or combination signals. McCain backplates are compliant with multiple agency standards including the Institute of Transportation Engineers (ITE), Caltrans, and many state Departments of Transportation (DOTs). Available in a variety of standard and custom colors to match the signal head, backplates provide an aesthetically pleasing and functional look for your intersection.

## Benefits and Features

- Enhances signal visibility by creating an environmental contrast
- Fits 12" McCain signals
- 5" border width
- Louvered aluminum
- Standard flat black powder coat
- Compatible with elevator plumbizer (MAS) and standard mountings

## Product Description

This 3-piece version of McCain's backplates fits McCain 12" signal heads and is fabricated in louvered aluminum with five-inch borders.

The backplate aluminum is 0.050" thick and is powder coated flat black for increased visual contrast against the background.

These backplates are designed to fit McCain 5-section cluster signal heads, commonly called a "doghouse" configuration. Two versions are shown for standard and MAS mounts.

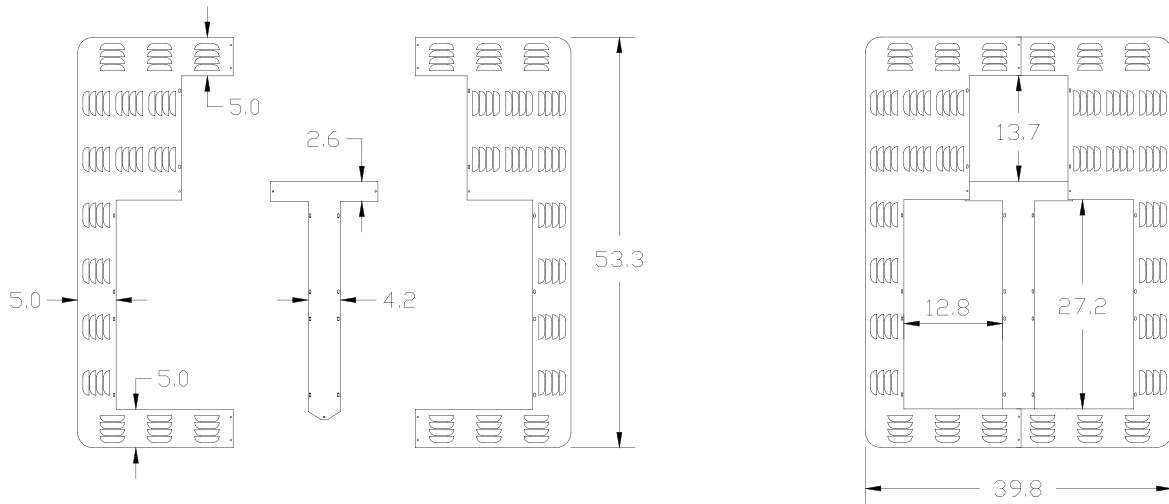

## Part Numbers

M18064 - MAS Mount

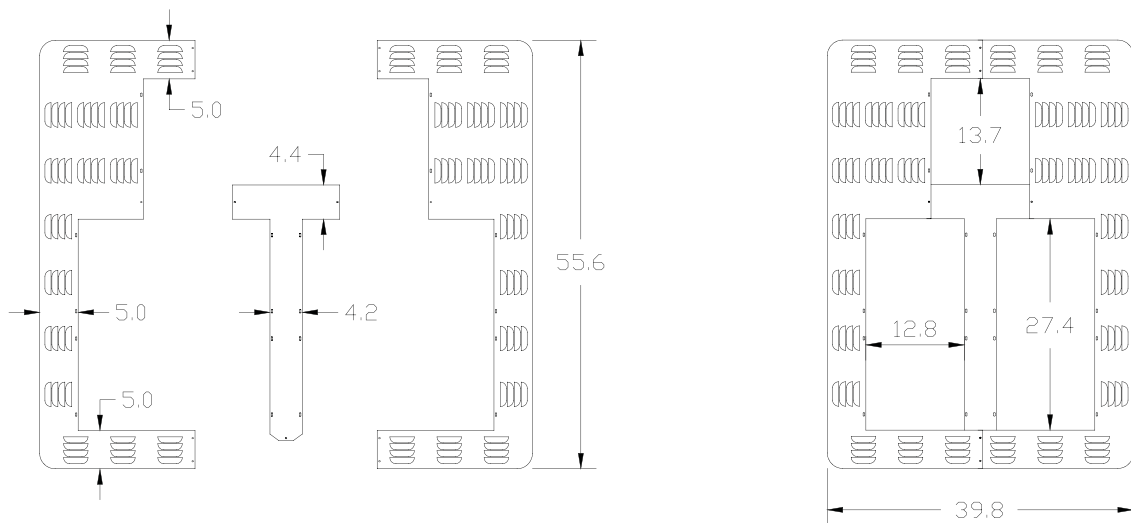

M18083 - Standard Mount
